## **Monner Springs Fence Build – March 21, 2023**

Today 8 Bend OHA members teamed up with 4 Ochoco National Forest Wildlife Biologists, Forestry, Aquatics and other USFS employees (10 total) to work on the Monner Springs fence. Last year Bend members came together to re-build the guzzler which had been damaged in the past from a fire.

The purpose of the fence build is to create an enclosure is to keep cattle out of a narrow draw that has good habitat for quail and other wildlife. Bend Chapter members feel very fortunate to be able to team up with a great group of forest service employees that all work well together.

Lunchtime was a special treat with a potluck occurring. Robbie Piehl made a remarkable smoked pulled chicken which was served with dishes such as, fruit salad, potato salad, broccoli salad, pasta salad, baked beans with elk meat.....

The northern end of the enclosure from Monner Springs to the guzzler was completed with a short section to the south needing to be completed still.

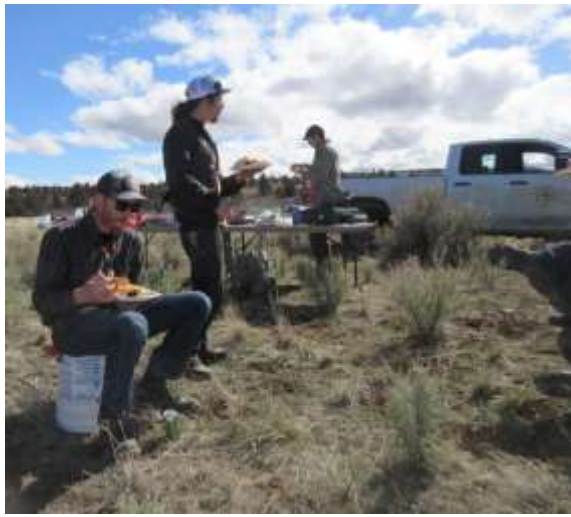

USFS and OHA preparing to roll out the next section of wire with a quad.

Viri Glennon, USFS employee and OHA member always seen with a smile.

Monty Gregg, USFS Wildlife Biologist is another person that never misses a chance to smile. Both Monty and Robbie display such a passionate attitude about what they are doing that makes these types of work projects fun and rewarding.

OHA Members put in 64 hours of volunteer time today. Those involved were Greg Petsch, Dave Sweet, Eric Brown, Rex Parks, Brian and Teri Gainer, Dan Ramming and Bill Ham.
